sink and tap collection

Empoli TS138
Bollente Chrome tap TT50

The Tuscan collection offers an extensive choice of stunning sinks and taps. Elegant yet hard wearing, our range allows you to make your own statement with classic and contemporary styles across a choice of materials.

High on looks yet low on maintenance, Tuscan sinks and taps withstand daily wear and tear, are easy to clean, and provide a hygienic and durable surface whilst retaining their stylish appearance.

Whether you prefer the fresh, contemporary look of polished stainless steel or the nostalgic quality of a traditional Belfast, a Tuscan sink and tap add a touch of luxury.

Disclaimer

The Tuscan sink and tap Collection is manufactured from carefully selected materials, and subject to stringent quality control procedures. Due to variables in the photographic and printing processes, colours shown in this brochure may vary slightly from the actual product. We reserve the right to amend any details or product specifications without prior notice.

Belfast

Ceramic sink

Perfectly at home in a traditional kitchen, the individually handcrafted Belfast sink is finished in ceramic fireclay for a tactile, non-porous surface that's highly resistant to heat and common household chemicals and detergents.

The integrated weir overflow adds to the classic look of the sink, which fits onto a standard Belfast sink base cabinet and is perfectly paired with the Chianti tap.

Bollente Instant Hot Taps

Bollente instant hot taps combine high performance, style and innovation with the convenience of instant steaming hot water.

The **3 in 1** delivers steaming, hot and cold water from the same spout, whilst **Bollente Direct** is a single dispense tap delivering steaming hot water only.

Features & benefits of both models

- Suitable for use with any worktop, including laminate
- Tap, tank and filter all included in one box
- Non-pressurised system, meaning no spitting and spluttering
- An inbuilt safety mechanism ensures boiling water is not accidentally dispensed
- Suitable for DIY installation, or professional installation, which is available on request
- 2 year guarantee covers parts and labour, subject to a filter change every 6 months
- WRAS approved

Sink Dimensions	595mm (w) 455mm (d) 255mm (h)
Depths/Capacity	Main Bowl 255mm / 43L

Colour available	
White Gloss Ceramic	TS101

Cortona 1.0 Bowl

C/W chrome waste & overflow (boxed)

Min Base Unit	600mm
Depths/Capacity	Main Bowl 235mm / 45L

Colour available	
Polar White Ceramic	TS102

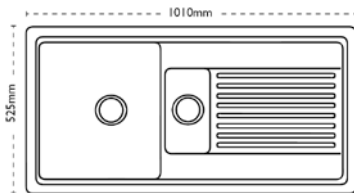

Cortona 1.5 Bowl

C/W chrome waste (boxed)

Min Base Unit	600mm
Depths/Capacity	Main Bowl 235mm / 33.8L Half Bowl 110mm / 6L

Colour available	
Polar White Ceramic	TS103

Care & maintenance

General Cleaning Instructions

Always wipe the sink down with warm soapy water and a cloth to remove everyday stains from your sink. In hard water areas limescale deposits can build up on the sink over a period of time; to remove limescale we recommend the use of lemon juice or vinegar.

Granite & Ceramic

For general cleaning and removal of marks a mild cream cleaner and a non-metallic scouring pad must be used. China rubbers will clear most marks on ceramics – these must be used with washing up liquid.

Stainless Steel (brushed finish)

A liquid cleaner can be used with a soft damp cloth for everyday cleaning and mark removal.

Stainless Steel (polished finish)

For general cleaning and removing marks a stainless steel spray cleaner with a soft damp cloth should be used.

To avoid accidental damage, we recommend that you do not chop food directly on the surface of the sink or drainer.

Avoid dropping sharp objects into the sink, as this may scratch or damage the surface. Do not use plastic washing up bowls, as particles of grit which may be impregnated in the bowl could scratch the surface of the sink, or produce a grinding action between the plastic bowl and sink surface.

You must not pour strong chemicals down the sink such as bleach, ammonia, caustic soda, paint stripper, or sterilising solutions. If this should happen accidentally, wipe the spill away quickly with a dry cloth, then rinse with plenty of water.

Leaving neat bleach in sink bowls can cause damage to all sinks - even stainless steel. If neat bleach should come into contact with the sink, rinse thoroughly with warm soapy water.
